

## COVID -19 Temporary Closure

March 19, 2020

In order to protect the health of our employees and their families, Stedham Electronics will be closing for a two week period from March 23 through April 3. This is in coordination with an order by the Governor of Nevada who has ordered a temporary shut-down of "non-essential business" for the entire state of Nevada.

During the two week shut-down period manufacturing operations will be halted. We know this is an inconvenience for our customers. It is our hope that through this preemptive action we can avoid the spread of the COVID-19 Virus to our team and their families which would cause even larger interruptions and potentially serious health concerns in the future. We are of course paying our employees during this time frame and asking them to self-quarantine to reduce the risk of exposure.

We are very sorry for this interruption but drastic times often require drastic measures. Be safe.

A handwritten signature in blue ink, appearing to read "David Stedham".

David Stedham  
President
