California Prop 65 Statement

Proposition 65, officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986, was enacted as a ballot initiative in November 1986. The proposition helps protect the state’s drinking water sources from being contaminated with approximately 900 chemicals known to cause cancer, birth defects or other reproductive harm (“Proposition 65 Substances”) and requires businesses to inform Californians about exposures to Proposition 65 Substances.

Stedham Electronics does not manufacture or market consumer products. However, the parts and components that Stedham Electronics manufactures and markets may be incorporated directly or indirectly into various consumer electronic products (e.g., computers, handheld devices) and larger consumer products such as white goods and automobiles. Proposition 65 Substances used by Stedham Electronics may include, but are not limited to solder/alloys/plating, nickel alloys/plating, and antimony trioxide bound in some plastics. Due to the use of Proposition 65 Substances in some of our products, Stedham Electronics is providing warnings where appropriate.

WARNING This product contains solder/alloys/plastics some of which may cause cancer and reproductive harm.
